1. What makes me most excited about your class is learning the difference between communication in french and english as that was one of my biggest worries going to a all french school like La Cité
2. I am really not nervous about anything in this class because i have been speaking in english my whole life and my writing is better in english than in french.
3. My strength is definitely the the fact that I naturally speak english in my day to day, but what in need to learn are the terminology related to firefighting.
4. I really have no clue... I listen to music but I couldn't tell you a single one of the titles. right not the only word that describes me right now is "determined"

Watch the video: <https://youtu.be/gerZYq62oYg>
Complete the task at the bottom of the slide.

Description of the Structure

The structure is a residential house built with a brick finishing, category 5 building. The house is a single story bungalow (0:55). The house was built in the seventies. There are seven rooms in the house.

TASK: Write one to two paragraphs that **describe the structure**. Use the information from the video; however, feel free to add details that you might not get from the video (i.e. number of floors, the rooms inside the home, the year of the building, the purpose of the building). Be sure to include timestamps from the video that help to support your statements (i.e. the fire spread from the left side to the right side [2:34]).
